To Whom It May Concern:

Persistent Organic Pollutants (POPs)

The Stockholm Convention on Persistent Organic Pollutants (POPs) essentially bans the international use of listed POPs from products in the global marketplace.

Cortec Policy

It is Cortec's policy to conduct business in a manner consistent with sound environmental management practices and to comply with applicable environmental laws and regulations. Through the use of best management practices, improvements are continually made to conserve natural resources and to minimize the use of environmentally sensitive materials.

Cortec Precision Sheetmetal is committed to meeting the requirements of the Stockholm Convention of POPs and has reviewed its corporate standards accordingly. This letter is to declare that, to the best of our knowledge, Cortec Precision does not use any of the POPs listed in any of the products listed in the Product List. Cortec is a metal fabricator and does not manufacture anything with POPs or generate it as a byproduct.
